puffer

I started the puffer a while ago and have previously posted bits and bobs in the forum ,am having problems uploading pictures will try with mobile app and see how it goes .

Its been a while

I started this puffer a while ago(2 years actually) I was going to be for one of my good lady's landmark birthdays (hold to eventually be filled with presents) but the big C decided to intervene and the build was put on the back burner ,Once I was a bit better I did a little bit on her (the puffer not the wife) when I could .she's nearly done (again the puffer) will post more photos when she's in the harbour (?). Cheers Marky?
