1/48 Flower Class Corvette

by Mikep

27th Aug 2018

1/48 Flower Class Corvette

Preparing to build a 1/48 scale WW2 Flower Class Corvette, just recieved the hull from Fleetscale excellent quality also purchased from them was the prop shaft, prop, and stuffing box and rudder. The materials and craftsmanship on these are priceless. The motor is a MFA/ combo drills 12v D.C. pt No. 457-RE800 and I plan on using a Viper marine 40 amp Mtroniks speed control perhaps a little overkill.
