Ady Gil Trimaran Wave Piercer

by rcmodelboats

11th Oct 2018

Ady Gil Trimaran Wave Piercer

This build started out as a crap toy speed boat that resembled the New Zealand wave piercer Ady Gil (ex- Earthrace) that was cut in two in 2010 by the illegal Japanese whaling vessel Shonan Maru no2. The original speedboat toy was 22 inches long and had straight wings that connected the pontoons, the wings and the pontoons have been changed and custom made onto the existing hull and the bow has been extended and sharpened (now 26in), the stern has been rounded. The hull has now been gel coated and i have started sanding it back.

1st Jan 2019

Ady Gil, trimaran

So far I've shaped the wings to the correct shape and water proofed the hull. The pictures of the boat in white were taken before the wing photos
