## White Star BB"570"

by Tica

19th Jan 2019

## White Star BB"570"

Started on an easy build. A White Star from Billing Boats. As usually the build instruction is very basic, all is more or less shown on the main drawing. I have skipped the original 3mm shaft and added a 4mm from Robbe incl. a 3 blade Graupner racing prop as used in my Classic. I'll be using a 1100KV Brushless motor with a 2S LiPo. The basic of the hull is now done.

20th Jan 2019

## Cabin structure

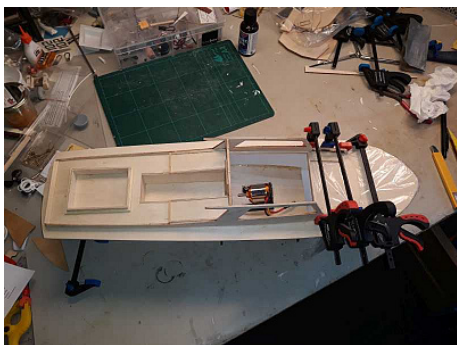

A bit of progress, it's a bit of a challenge to assemble the structure as there are only a general over view on the drawing. But the cabin is coming together.

26th Jan 2019

## Progress on the cabin

A bit of slow progress, dame? Billing do not make it easy to assemble it

31st Mar 2019

## A bit more progress

Not many pictures but getting a bit more done, do have a fight with bending the top part for the flybridge steering position.
