Free fall anchor winch, Maersk Topper, scale 1/50

My home made Free Fall anchor winch for my model Maersk Topper. The original design is made by <http://www.ankerwinde.eu/de/> But My anchor and chain is too heavy so I adjusted the chain roller and extra guide rollers. First I made a test model to test if all modifications are really working.

part 2

The base plate has been enlarged in the new model. The vertical base has been enlarged so that the guided rollers can also be mounted on this plate.
