HELP needed on a hull.

Hi everyone I need some HELP HELP!!!!. I have been given a hull and I do not know anything about what it is and how to try to build it up. ????? I have posted some picture and hope that some of you out there can tell me what it is and maybe show me a picture of how it should look when finished. Hopefully I can add some R/C to sail it. I have only ever been into MTB's and RAF Crash tenders and fast power boats.
