## 46" Crash Tender

I've started and so far (touch wood) not had any real issues, made up jig to hold everything straight. Am still unsure what power option to go with, Enya 60 is out of my old Sea Queen, but think may use the brushless motor ?.

## 46" Crash Tender

I thought I would give a update on how the build is going, it's slow going as I'm working a couple of weeks night shift ? anyway, I have got as far as fitting the wood strips along the sides.
