row row row your boat

just a start of a rowing boat challenge sorry for the mishaps but the last one worked this is a test rig to see if i can make one ?? lest hope it do not go ??

24th Feb 2020

update on row row

after a test i found that belt slip was bad very bad so been trying an old printer belt 3mm wide and motor, having to glue bits to the center drive disc then trying to glue the cut belt back together this worked fine now having trouble setting the motor but getting there photos to follow

16th Sep 2019

row boat

been thinking over the last days of powering the oars moving the oar to the end of the shaft or powering both oars from a single shaft on the centre line or combine both so oars to end powered by a single shaft more to follow

16th Sep 2019

test

test rig with servo

12th Dec 2019

power fin

took my part completed row boat to the club house and after a bit of banter the topic got round to sculling a row boat but unable to config a figure 8 motion for the ore . Looking on the internet i found a power fin see video will this be my next challenge

2nd Dec 2019

video test of meck

built on a base board that fits into row boat now to fit servo for left / right both drive and main drive

18th Sep 2019

it sort of works

well what can i say it sort of works with a bit of fiddling lets see then the crew arrived !!!!

20th Sep 2019

row boat

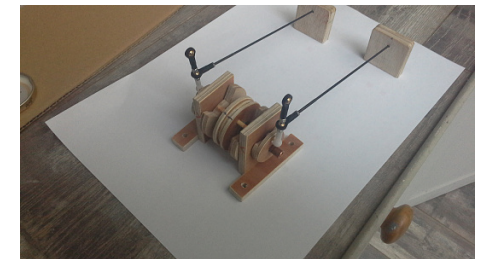

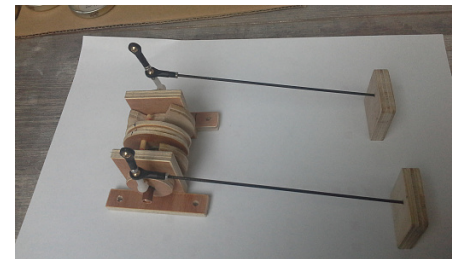

now the sides have been added waiting for the glue to dry then to trim down to size

1st Dec 2019

rowing meck update

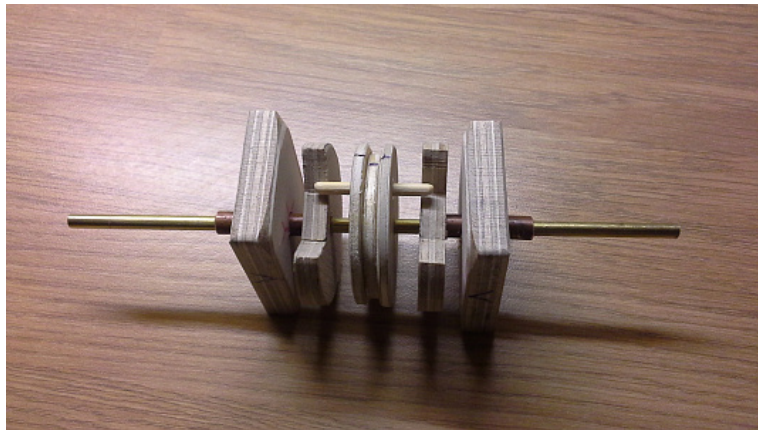

just a little more on the meck but one side will have to be removable to fit drive belt when the worst happens

23rd Nov 2019

meck update

had a few hours this afternoon so started in the drive meck for the ores still a bit more to do with this as waiting on some bits from china

5th Oct 2019

test

sides trim'd down varnished 4 coats Monday is on the water test so hopefully all will be well will post video work or fail it will be show'n only managed to get a 4 second film it worked

10th Oct 2019

twin servos

now looking at running 2 servos on continuous rotating but having trouble sinking them (Glug glug glug!???) any help out there i am using 2 x 9g servos, so the row boat can turn ????

15th Nov 2019

waiting

parts waiting to arrive all the way from china then i can get on with the build ??
