Egret Cabin Cruiser

Well just can't help my self with the snow & cold weather need to start another scratch build boat . found the plans on the internet & liked the design .Single prop 5 3/4 inch beam & 23 inch length speed 480 brush motor . Jumped from frame to built model .

Egret Cabin Cruiser

Just installed motor took a while getting it lined up in hull . I worked 40 years as a electrical maintains man & lined up tonnes of motors but lining up a tiny motor in a model boat is a real pain . If you see the nickel it's just something I do the nickel has the year model built .I used to put a penny's in but Canada no longer uses penny's . I think it was a tradition that real boat builders put a penny under the main mast for good luck .

New name for Egret Cabin Cruiser now Harley Quinn

Been a while since last update & I think I'm finally finished will latest scratch build until final real water test in a few months after Canada's winter. Still need to add to my Harbour section later on .
