trailer for a aqua rama riva 1/10 scale speedboat

Hi all has anybody got a plan for a boat trailer or where I can get one from. I have had a look on on the net. There are a couple of ready made ones but I would like to have a go at making my own.

riva aquarama

Hi all dived into youtube on the control of two speed controllers. found some good tutorials on how to programme my transmitter to enable the use of both gimbal sticks to control both motors to one stick. (throttle). then to control each motor on the other stick individually to be able to help the rudders turn the boat. Jim.

TRAILER FOR AQUA RAMA RIVA

Well, cheers chaps thanks for the replies the build is about half way through, not looking forward to the finishing coats of varnish it looks like a mammoth task just ordered up lots of sheets of very fine wet and dry = 3000 to 7000. just hope i have the the energy to keep rubbing . not 16 any more.?

TRAILER FOR AQUA RAMA

Hi lads i notice that some of us are having a bit of a problem carrying our boats to and from our means of transport to our lakes / ponds a couple of the more senior chaps at our club have taken to using the four wheel garden trolleys. i know they are rather large but you can fit a whole load of gear on them. our chaps seem to favor them for the large tugs they like to build.

Riva Aquarama

you are not wrong my friend fell in love with her at the southern counties model show in 2018 a chap had the great big one but just as a static model she looked as if you could swim in the clear coats of varnish. Mines the 85 cm version little sister but just as beautiful. been on line quite a bit now researching the power system a lot of peeps are warning you off the amati set up (cheap and nasty was one discription) not strong enough very bad vibration through the motors to propshaft connections. I will copy the amati kit but beef up all the components. anyways thank you for you time and effort Jimmy.

31st May 2020

Aquarama Riva

Hi Bill the manufacturer of the model is Amati I have tried their home web page but they dont show the particular down load I need. I sent them a E,mail request for the info I need lets see how good there customer services are. thanks for the reply. Jimmy.

AQUA RAMA TRAILER

Thank you chaps for your for your posts on the boat trailer. i tried you tube in england very limited as was pointed out. went on a bit of a hunt through the american you tube found quite a few some simple made from plywood and aluminium strip to all metal ones using the fittings and suspension from some of the model monster trucks. whatever looks like its gonna be fun. cheers all keep safe.

WAVE PRINCESS MORE MONEY THAN SENSE.

Hi chaps its been a while since i have been on line with the build to see how i,m getting on well i have had a go and finished my first child ??? i did tart her up a bit maybe relying to much on looks than substance but i think that is for other people to judge. still a silly sod for a pretty girl. when i work out how to add piccys i will add them to my blog. stay safe it wont last for ever. Hi chaps worked out how to add pics.

Aquarama riva build.

Hi chaps can anybody out there help, Managed (all on my own) to lose miss place or chuck away the building instructions. put the lot into a build folder and hey presto vanished. So has any of you kind members got a copy of the build instruction and the electric build instructions I could take a copy of I have no problem in paying for a set its the electric build instructions that I really need I want to install a twin prop setup. Cheers chaps, Jim.
