## T.i.D Tug

I brought this model in the shape it is in about 3 years ago hoping that one day I could get round to making it a model to be proud of.. I will be basing this on the T.I.D 164.. I will try and include as many updates and pictures as I can, if anybody wants to correct me or have an different way of doing something please up in.. Kind regards George

## The start

Well I spent a few hours yesterday building a bench, and looking over the T.i.D to find a few holes have been drilled in the wrong place.. so the first job to do is get them filled in and remark and drill the them in the right place.. but I did make up where the anti slip deck stopped and started.. sorry about the poor picture quality..
