Test Floats - Sea Trials

I took my three winter builds up the street to my neighbours pool. Tug Miss Katherine, Vosper, and Folk sailboat Ballast was good on all three. I had my Forward/Reverse power controls set-up opposite to what I prefer but those were just minor adjustments. Surprised that the Vosper requires a larger turning radius, though I did not give it much power in that small pool, especially on the first test out of the bathtub. Rather hard to take photos and control at the same time. I took a couple videos too but they did not turn out very well. It is a small outdoor pool, but for my first test float, it was perfect for me. No swimming was required!!?
