Grand Banks Yacht

Purchase this Amanti kit about 15 years ago , started to build the cabin found that every thing went to gether real good but when it came to start on the hull I had no idea of how to fasten the lap stape to the fibreglass hull so model was put on the back burner for a few years, talked with an other model builder and he said he could finish the model for me which he has done, now waiting for soft water to try it out, It has 2 gear motors for power
