45 RBM

by CaptLarry

15th Jan 2020

45 RBM

This is the latest acquisition for my Harbor...Graupner 2155.V2 Twin Jet Boat. This is the same boat that the USCG uses, Medium Response Boat 45 (45 RB-M). The major superstructure difference is the raised deck area on the bow. I have studied the possibility of cutting this away for a more scale look.....buuuut.....it looks like I will have to settle for semi-scale. Otherwise the color and decals will match.
